

Unique Number of Occurrences [\(View\)](#)

Given an array of integers `arr`, return `true` if the number of occurrences of each value in the array is **unique**, or `false` otherwise.

Example 1:

Input: `arr = [1,2,2,1,1,3]`

Output: `true`

Explanation: The value 1 has 3 occurrences, 2 has 2 and 3 has 1. No two values have the same number of occurrences.

Example 2:

Input: `arr = [1,2]`

Output: `false`

Example 3:

Input: `arr = [-3,0,1,-3,1,1,1,-3,10,0]`

Output: `true`

Constraints:

- `1 <= arr.length <= 1000`
- `-1000 <= arr[i] <= 1000`
