

Largest Rectangle in Histogram [\(View\)](#)

Given an array of integers `heights` representing the histogram's bar height where the width of each bar is `1`, return *the area of the largest rectangle in the histogram*.

Example 1:

Input: `heights = [2,1,5,6,2,3]`

Output: 10

Explanation: The above is a histogram where width of each bar is 1.

The largest rectangle is shown in the red area, which has an area = 10 units.

Example 2:

Input: heights = [2,4]

Output: 4

Constraints:

- $1 \leq \text{heights.length} \leq 10^5$
- $0 \leq \text{heights}[i] \leq 10^4$
