# Remove Duplicates from Sorted List – II (View)

Given the `head` of a sorted linked list, *delete all nodes that have duplicate numbers, leaving only distinct numbers from the original list.* Return *the linked list **sorted** as well.*
Example 1:

```
Input: head = [1,2,3,3,4,4,5]

Output: [1,2,5]
```

Example 2:

```
Input: head = [1,1,1,2,3]

Output: [2,3]
```

Constraints:

- The number of nodes in the list is in the range `[0, 300]`.
- `-100 <= Node.val <= 100`
- The list is guaranteed to be **sorted** in ascending order.
